## DEPARTMENT OF PUBLIC WORKS

Angelo Grasso, Director of Municipal Utilities
agrasso@galvestontx.gov | Office Number: (409) 797-3962 | www.galvestontx.gov

**Date: February 10, 2020**

**To: Brian Maxwell, City Manager**
**Honorable Mayor and City Council**

**From: Angelo Grasso, Acting Director of Public Works**

**Re: Consider approving purchase of traffic signal equipment, supplies and hardware using the contract with Texas Highway Products through the HGACBuy purchasing cooperative. Estimated costs for products is not to exceed Council approved budget for the Traffic Division. Authorizing the City Manager to execute all necessary documents upon final approval by the City Attorney.**

## I. Background:

The City of Galveston is a member of the HGACBuy cooperative purchasing program, governed by other Texas municipalities, this allows the city to utilize contracts that have been competitively procured in compliance with state purchasing requirements. Texas Government Code Section 791 authorizes local governments to contract, as much as possible, with other local governments and any agencies of the State of Texas.

The HGACBuy purchasing cooperative is endorsed by the Texas Municipal League. The objective of a cooperative purchasing program is to provide a mechanism for local governments to pool their collective purchasing power. Purchasing cooperatives save money in two ways: the price of the product and/or in the administrative cost savings from advertising for a formal solicitation. The City of Galveston has received member rebates in the past from HGACBuy.

## II. Current:

Texas Highway Products has a contract with HGACBuy. The contract number is PE065-19. This contract provides for various percent discount on various traffic signal related equipment and traffic control devices/products/equipment.

Attached is the contract information for HGACBuy contract number PE065-19:

## III. Alternatives:

- Approve using the cooperative purchasing contract through HGACBuy for Texas Highway Products
- Do not approve using the cooperative purchasing contract and bid office supplies through the Purchasing Department.

off the premises by authorized representatives of its own or any public accounting firm selected by H-GAC. The right of access to records is not limited to the required retention period, but shall last as long as the records are retained. Failure to provide access to records may be cause for termination of the Agreement. The records to be thus maintained and retained by the Contractor shall include (without limitation): (1) personnel and payroll records, including social security numbers and labor classifications, accounting for total time distribution of the Contractor's employees working full or part time on the work, as well as cancelled payroll checks, signed receipts for payroll payments in cash, or other evidence of disbursement of payroll payments; (2) invoices for purchases, receiving and issuing documents, and all other unit inventory records for the Contractor's stocks or capital items; and (3) paid invoices and cancelled checks for materials purchased and for subcontractors' and any other third parties' charges.

## ARTICLE 15: TERMINATION PROCEDURES

The Contractor acknowledges that this Agreement may be terminated for Convenience or Default.

A. *Convenience*

   H-GAC may terminate this Agreement at any time, in whole or in part, with or without cause, whenever H-GAC determines that for any reason such termination is in the best interest of H-GAC, by providing written notice by certified mail to the Contractor. Upon receipt of notice of termination, all services hereunder of the Contractor and its employees and subcontractors shall cease to the extent specified in the notice of termination.

   The Contractor may cancel or terminate this Agreement upon submission of thirty (30) days written notice, presented to H-GAC via certified mail. The Contractor may not give notice of cancellation after it has received notice of default from H-GAC.
B. *Default*

H-GAC may, by written notice of default to the Contractor, terminate the whole or any part of the Agreement, in any one of the following circumstances:

(1) If the Contractor fails to perform the services herein specified within the time specified herein or any extension thereof; or

(2) If the Contractor fails to perform any of the other provisions of this Agreement for any reason whatsoever, or so fails to make progress or otherwise violates the Agreements that completion of services herein specified within the Agreement term is significantly endangered, and in either of these two instances does not cure such failure within a period often (10) days (or such longer period of time as may be authorized by H-GAC in writing) after receiving written notice by certified mail of default from H-GAC.

**ARTICLE 16: SEVERABILITY**

H-GAC and Contractor agree that should any provision of this Agreement be determined to be invalid or unenforceable, such determination shall not affect any other term of this Agreement, which shall continue in full force and effect.

**ARTICLE 17: FORCE MAJEURE**

To the extent that either party to this Agreement shall be wholly or partially prevented from the performance of any obligation or duty placed on such party by reason of or through strikes, stoppage of labor, riot, fire, flood, acts of war, insurrection, accident, order of any court, act of God, or specific cause reasonably beyond the party's control and not attributable to its neglect or nonfeasance, in such event, the time for the performance of such obligation or duty shall be suspended until such disability to perform is removed. Determination of force majeure shall rest solely with H-GAC.

**ARTICLE 18: CONFLICT OF INTEREST**

No officer, member or employee of the Contractor or subcontractor, no member of the governing body of the Contractor, and no other public officials of the Contractor who exercise any functions or responsibilities in the review or Contractor approval of this Agreement, shall participate in any decision relating to this Agreement which affects his or her personal interest, or shall have any personal or pecuniary interest, direct or indirect, in this Agreement.

In connection with any rehearing under this Article, the Contractor shall be afforded an opportunity to be heard and offer evidence in support of its position. The decision of the Executive Director after any such rehearing shall be final and conclusive. The Contractor may, if it elects to do so, appeal the final and conclusive decision of the Executive Director to a court of competent jurisdiction. ## SPECIAL PROVISIONS

Incorporated by attachment, as part of the whole agreement, H-GAC and the Contractor do, hereby agree to the Special Provisions as follows:

### ARTICLE 1: BIDS/PROPOSALS INCORPORATED

In addition to the whole Agreement, the following documents listed in order of priority are incorporated into the Agreement by reference: Bid/Proposal Specifications and Contractor's Response to the Bid/Proposal.

### ARTICLE 2: END USER AGREEMENTS ("EUA")

**H-GAC** acknowledges that the **END USER** may choose to enter into an End User Agreement ("EUA) with the **Contractor** through this Agreement, and that the term of the EUA may exceed the term of the current **H-GAC** Agreement. **H-GAC's** acknowledgement is not an endorsement or approval of the End User Agreement's terms and conditions. **Contractor** agrees not to offer, agree to or accept from the **END USER**, any terms or conditions that conflict with those in **Contractor's** Agreement with **H-GAC.** Contractor affirms that termination of its Agreement with H-GAC for any reason shall not result in the termination of any underlying EUA, which shall in each instance, continue pursuant to the EUA's stated terms and duration. Pursuant to the terms of this Agreement, termination of this Agreement will disallow the **Contractor** from entering into any new EUA with **END USERS.** Applicable **H-GAC** order processing charges will be due and payable to **H-GAC** on any EUAs, surviving termination of this Agreement between **H-GAC** and **Contractor.**

### ARTICLE 3: MOST FAVORED CUSTOMER CLAUSE

Contractor shall provide its most favorable pricing and terms to H-GAC. If at any time during this Agreement, Contractor develops a regularly followed standard procedure of entering into agreements with other governmental customers within the State of Texas, and offers the same or substantially the same products/services offered to **H-GAC** on a basis that provides prices, warranties, benefits, and or terms more favorable than those provided to **H-GAC**, **Contractor** shall notify **H-GAC** within ten (10) business days thereafter, and this Agreement shall be deemed to be automatically retroactively amended, to the effective date of Contractor's most favorable past agreement with another entity. **Contractor** shall provide the same prices, warranties, benefits, or terms to **H-GAC** and its END USER as provided in its most favorable past agreement. H-GAC shall have the right and option at any time to decline to accept any such change, in which case the amendment shall be deemed null and void. If **Contractor** claims that a more favorable price, warranty, benefit, or term that was charged or offered to another entity during the term of this Agreement, does not constitute more favorable treatment, than **Contractor** shall, within ten (10) business days, notify **H-GAC** in writing, setting forth the detailed reasons **Contractor** believes the aforesaid offer is not in fact most favored treatment. **H-GAC**, after due consideration of Contractor's written explanation, may decline to accept such explanation and thereupon this Agreement between **H-GAC** and **Contractor** shall be automatically amended, effective retroactively, to the effective date of the most favored agreement, to provide the same prices, warranties,

benefits, or terms to H-GAC and the END USER.
***EXCEPTION:*** *This clause shall not be applicable to prices and price adjustments offered by a bidder, Proposer or contractor, which are not within bidder's/proposer's control [example; a manufacturer's bid concession], or to any prices offered to the Federal Government and its agencies.*

## ARTICLE 4: PARTY LIABILITY

Contractor's total liability under this Agreement, whether for breach of contract, warranty, negligence, strict liability, in tort or otherwise, is limited to the price of the particular products/services sold hereunder. Contractor agrees either to refund the purchase price or to repair or replace product(s) that are not as warranted. Contractor accepts liability to repay, and shall repay upon demand to END USER, any amounts determined by H-GAC, its independent auditors, or any state or federal agency, to have been paid in violation of the terms of this Agreement.

## ARTICLE 5: GOVERNING LAW & VENUE

Contractor and H-GAC agree that Contractor will make every reasonable effort to resolve disputes with the **END USER** in accord with the law and venue rules of the state of purchase. **Contractor** shall immediately notify **H-GAC** of such disputes.

## ARTICLE 6: SALES AND ORDER PROCESSING CHARGE

**Contractor** shall sell its products to **END USERS** based on the pricing and terms of this Agreement. **H-GAC** will invoice **Contractor** for the applicable order processing charge when H-GAC receives notification of an END USER order. **Contractor shall remit to H-GAC** the full amount of the applicable order processing charge, after delivery of any product or service and subsequent END USER acceptance. Payment of the Order Processing Charge shall be remitted from Contractor to H-GAC, within thirty (30) calendar days or ten (10) business days after receipt of an END USER's payment, whichever comes first, notwithstanding Contractor's receipt of invoice. For sales made by **Contractor** based on this Agreement, including sales to entities without Interlocal Agreements, **Contractor** shall pay the applicable order processing charges to **H-GAC.** Further, **Contractor** agrees to encourage entities who are not members of H-GAC**'s** Cooperative Purchasing Program to execute an **H-GAC** Interlocal Agreement. **H-GAC** reserves the right to take appropriate actions including, but not limited to, Agreement termination if **Contractor** fails to promptly remit the appropriate order processing charge to H-GAC. In no event shall **H-GAC** have any liability to **Contractor** for any goods or services an **END USER** procures from **Contractor.** At all times, **Contractor** shall remain liable to pay to **H-GAC** any order processing charges on any portion of the Agreement actually performed, and for which compensation was received by **Contractor.**

## ARTICLE 7: LIQUIDATED DAMAGES

Contractor and H-GAC agree that Contractor shall cooperate with the END USER at the time an END USER purchase order is placed, to determine terms for any liquidated damages.

## ARTICLE 8: INSURANCE

Unless otherwise stipulated in Section B of the Bid/Proposal Specifications, **Contractor** must have the following insurance and coverage minimums:

a. **General liability** insurance with a Single Occurrence limit of at least $1,000,000.00, and a General

Aggregate limit of at least two times the Single Occurrence limit.

**Product liability** insurance with a Single Occurrence limit of at least $1,000,000.00, and a General Aggregate limit of at least two times the Single Occurrence limit for all Products except Automotive Fire Apparatus. For Automotive Fire Apparatus, see Section B of the Bid/Proposal Specifications.

**Property Damage or Destruction** insurance is required for coverage of **End User** owned equipment while in **Contractor's** possession, custody or control. The minimum Single Occurrence limit is $500,000.00 and the General Aggregate limit must be at least two times the Single Occurrence limit. This insurance may be carried in several ways, e.g. under an Inland Marine policy, as art of Automobile coverage, or under a Garage Keepers policy. In any event, this coverage must be specifically and clearly listed on insurance certificate(s) submitted to **H-GAC**.

b. Insurance coverage shall be in effect for the length of any contract made pursuant to the Bid/Proposal, and for any extensions thereof, plus the number of days/months required to *deliver* any outstanding order after the close of the contract period.
c. Original Insurance Certificates must be furnished to **H-GAC** on request, showing **Contractor** as the insured and showing coverage and limits for the insurances listed above.
d. If any Product(s) or Service(s) will be provided by parties other than **Contractor**, all such parties are required to carry the minimum insurance coverages specified herein, and if requested by **H-GAC**, a separate insurance certificate must be submitted for each such party.
e. **H-GAC** reserves the right to contact insurance underwriters to confirm policy and certificate issuance and document accuracy.

## ARTICLE 9: PERFORMANCE AND PAYMENT BONDS FOR INDIVIDUAL ORDERS

**H-GAC's** contractual requirements DO NOT include a Performance & Payment Bond (PPB); therefore, Contractor shall offer pricing that reflects this cost savings. **Contractor** shall remain prepared to offer a PPB to cover any order if so requested by the **END USER**. **Contractor** shall quote a price to **END USER** for provision of any requested PPB, and agrees to furnish the PPB within ten business (10) days of receipt of **END USER's** purchase order.

## ARTICLE 10: CHANGE OF STATUS

**Contractor** shall immediately notify **H-GAC,** in writing, of **ANY** change in ownership, control, dealership/franchisee status, Motor Vehicle license status, or name. Contractor shall offer written guidance to advise H-GAC if this Agreement shall be affected in any way by such change. **H-GAC** shall have the right to determine whether or not such change is acceptable, and to determine what action shall be warranted, up to and including cancellation of Agreement.

## ARTICLE 11: TEXAS MOTOR VEHICLE BOARD LICENSING

All that deal in motor vehicles shall maintain current licenses that are required by the Texas Motor Vehicle Commission Code. If at any time during this Agreement term, any required **Contractor** license is denied, revoked, or not renewed, **Contractor** shall be in default of this Agreement, unless the Texas Motor Vehicle

Board issues a stay or waiver. Contractor shall promptly provide copies of all current applicable Texas Motor Vehicle Board documentation to **H-GAC** upon request.

# Appendix J – Scope of Services

1. **Project Title: Sludge Dewatering Chemicals.**

2. **Scope of Services Contact**

Questions about the technical nature of the Scope of Services will be directed to the **Purchasing Department**, Phone. 409.797.3579, e-mail: purchasing@galvestontx.gov.

3. **Special Conditions**

Bids will be considered from manufacturers who have commercialized products used in wastewater treatment for a period of three (3) years or more, who manufacture a broad product line, and have competent trained personnel familiar with coagulation and dewatering of wastewater sludge. The contractor must also verify a capability of manufacturing or purchasing the polymer used in sufficient quantity of guarantee delivery of material to meet the City of Galveston's demands. The primary product must have been successfully pre-qualified by the city and is currently being used in dewatering aerobically digested sludge in order to be acceptable for bidding in this contract. The city reserves the right at any time during the period of this contract to substitute other polymers as manufactured by the contractor (if tests indicate more efficient results in performance and / or cost). The city also reserves the right to test products of other manufacturers, for future qualifications, during the period of this contract.

4. **Brand Manufacture Reference**

The City has determined that any manufacturer's brand defined in the Scope of Services meets the City's product and support need. The manufacturer's reference is not intended to be restrictive, and is only descriptive of the type and quality the City desires to purchase. Quotes for similar manufactured products of like quality will be considered if the Bid is fully noted with the manufacturer's brand name and model. The City reserves the right to determine products and support of equal value, and whether other brands or models meet the City's product and support needs.

5. **Key Events Schedule**

| | |
|---|---|
| Bid Release Date | December 16, 2019 |
| Deadline for Submittal of Written Questions | January 10 , 2020 @ 2:00 p.m. CST |
| Sealed Bids Due to and Opened by City | January 21, 2020 @ 9:00 a.m. CST |
| Anticipated Committee Evaluation Review Date | February, 2020 |
| Anticipated Award Date | February, 2020 |

6. **Scope of Services**

**SCOPE:**

It is the intent of these specifications that the Contractor(s) furnishes **Dewatering Chemicals** that the City of Galveston requires during the period of agreement. The City of Galveston reserves the right to order such quantities of **Dewatering Chemicals** as it requires, and the city also reserves the right not to order any, that is not required during the period of the agreement.

Any and all quantities listed are only estimates based on prior year's usage, and are for acquainting the bidder with probable usage. These estimates are not intended to set forth minimum or maximum quantities of this contract.

The city reserves the right to revise or amend the specifications prior to the date set for opening bids. Addenda or addendum to these specifications, if any, will announce such revisions or amendments. Copies of such addends so issued will be furnished to all prospective bidders.

**DELIVERY:**

Delivery shall be required at no additional cost to the City of Galveston to the desired City locations.

The contractor shall be required to have in its stock a sufficient quantity to supply the reasonable demands of the city promptly upon request. If unavailable from stock, it shall be the contractor's responsibility to obtain the same Dewatering Chemicals from some other source. In the event the contractor fails to secure the required Dewatering Chemicals within forty-eight (48) hours, the city shall have the option to obtain the required Dewatering Chemicals from an independent source.

Any attempt by the contractor to substitute and make delivery of Dewatering Chemicals other than the brand or trade name proposed, without prior written approval by the city, will be sufficient ground for immediate cancellation of the contract.

**PRICE REVISION CLAUSE:**

Wherever possible, the city desires firm prices for the full contract period. It is recognized by the city that qualified bidders may be unwilling to guarantee each category of unit prices during the entire period of the contract because of price changes from the bidder's source supply. In such instances, and asterisk (*) must be placed by the item, or items, which the bidder is not willing to guarantee the price for the full contract period and the partial period of the contract price, should be noted on a separate sheet. Such items will be subject to price changes due to increases or decreases in cost from the bidder's source of supply during the term of the contract. Items not marked by an asterisk will be held to unit price for the entire term of the contract.

**PRICE INCREASE(S):**

Price increases may be granted by the city at the City's option and are eligible only when based on comparable price increases for the contractor's source of supply. All prices stated on the bid

form shall be considered as firm for the entire contract period unless the bidder states on or attaches to the bid form a price increase provision. No price increase shall be granted in excess of the actual or percentage cost increase from the bidders source supply. Bidders shall have the burden of providing documentation of increases from bidders' source to the satisfaction of the purchasing supervisor, City of Galveston, prior approval. The city must have a thirty (30) day notice of a price increase prior to said increase becoming effective.

If there are any reductions in the price of the items bid, the city shall be given the benefit of such reduction and the same discounts (if any) shall apply. All products offered, furnished under these specifications shall be current production.

Bid proposals, which attempt to alter any of the enumerated provisions stated within this specification documentation may be determined as a non-responsive bid and may be subject to rejection. The city reserves the right to reject any price increase, and obtain a different source or sources to meet its requirements as to such item subject to said price increase when such action serves the best interest of the city. Bidder agrees that the city's exercise of its option to obtain alternative sources does not constitute a breach of contract.

**WORKING DAY DEFINED:**

A working day is defined as a calendar day, excluding Friday, Saturdays, Sundays, and legal holidays authorized be the City Council of the City of Galveston, in which weather or other conditions not under the control of the contractor will permit the performance of principal units of work underway for continuous period of not less than 7 hours between 7:00AM and 5:00PM. A principal unit of work shall be that unit which controls the completion time of the contract. Work on Saturdays, Sundays, or a legal holiday will not be permitted except in cases of extreme emergency, then only with the permission of the City's Municipal Utilities Department.

**TECHNICAL SPECIFICATIONS**

The material to be furnished in this contract will be used by the Wastewater Division of the Department of Municipal Utilities, to aid in the dewatering of municipal biological wastewater treatment sludge produced by the city's Main Wastewater Treatment Plant. The chemicals used are the cause effective conditioning and flocculation of the sludge, which is applied to a dewatering process used by the city. This process consists of two Ashbrook Filter Belt Presses and 2.0 m 3DP Belt Presses. The solids processed by this facility can be disposed of in Public landfills or in a landscaping /soil conditioner by the city. This contract will evaluate liquid polymer flocculates.

**MATERIALS:**

The polymer materials to be bid shall be required to have a shelf-life of at least four (4) months. The supplier will be held accountable for any loss of the material due to its failure to meet this requirement. **The liquid Polymer shall be delivered and contained in totes.** The supplier shall also provide a list of published physical and chemical properties and all deliveries of materials are to reasonably comply with these specified properties. All materials shall be delivered and unloaded, by the supplier, at the City of Galveston main wastewater treatment plant ready for immediate dilution with water and injection into the dewatering system. The polymers supplied shall be the best available chemicals through the duration of this contract, which will satisfactorily meet the included performance specifications.

**PRE-QUALIFICATION:**

The polymer used shall be required to meet these specifications in a trial test performed by the manufacturer, prior to bid opening, which shall run under the observation of The Department of Municipal Utilities. The testing will be done at the city's main wastewater treatment plant, with sampling and analysis performed by the city. The duration of testing will be two (2) consecutive normal operating days. It will be the responsibility of the supplier to demonstrate that the material bid can meet the qualifying test. The supplier will be required to conduct a test under the City of Galveston's supervision to ensure compliance with these specifications whenever the city notifies supplier that the material being used is not satisfactory. Polymer will be used in a manner which is to the best interest of the city. If the polymer cannot be fed using the existing feed system, it will be the responsibility of the supplier to furnish the necessary equipment for feeding the polymer. There must not be a problem with stratifying of polymer in bulk tanks. If such a problem occurs, it will be the responsibility of the supplier to take appropriate steps to correct it. The material shall be free of any foreign elements or compounds that may injure dried sludge for use as a soil conditioner, or affect the biological process of the treatment facilities, or seriously influence operations of the treatment facilities.

**PERFORMANCE SPECIFICATION:**

Based on pre-qualifying testing, the following minimal specifications will have to be met:

| | | |
|---|---|---|
| 1. | Sludge Production Rate | Approximately 5 to 10 tons dry solids / day |
| 2. | Sludge Production Hours | 7:00AM – 5:00PM Monday thru Thursday |
| 3. | Feed Solids Concentration | 2% to 3% From Gravity Thickener |
| 4. | Solids Concentration of the Sludge Cake | Minimum 16% on Ashbrook Klampresses Dewatering and 2.0 m 3DP Belt Presses |
| 5. | Percent Recovery | Greater than 95% |

$$\text{WHERE: \% RECOVERY} = \frac{(\text{FEED SOLIDS} - \text{FILTRATE SOLIDS})\ X100}{\text{FEED SOLIDS}}$$

**TECHNICAL ASSISTANCE:**

The successful bidder shall provide that a qualified service representative visit the main wastewater treatment plant at least once during the duration of the contract, and be on call to answer or assist in any questions or problems that might arise in the application of the product in the sludge dewatering process

**BID CONDITION:**

The successful bidder shall supply the material in sufficient quantity to maintain continuous operation of the dewatering facility. The contract will be for fifteen (15) months from date of notice of award. It is estimated that the City uses 20 totes of polymer per year.

The bids will be tabulated on the net cost and dosage required, in pounds of polymer per ton of dry solids. The award is based on the lowest treatment cost and the desired filter yield:

1. $/TONS DRY SOLIDS = LBS. PRODUCT X COST PER LBS. PRODUCT
   GROSS TONS X % CAKE SOLIDS

Cake solids samples shall be obtained from near the sludge discharge scraper. Three (3) equal portions shall be taken across the belt; one approximately 6 inches from the each side of the belt and one from middle of the belt to provide specified volume. The two sets of cake samples shall be collected with a minimum of two hours intervals apart. The cake solids shall be averaged to compute the % cake solids used in the cost of polymer per tons of dry solids formula.

The filtrate solids samples shall be collected at the press drain. The two sets of filtrate samples shall be collected with a minimum of two hour intervals apart.

Two sets of feed solid samples for each press shall be collected before the polymer is injected into the sludge. The feed solids samples shall be collected at the same time as the filtrate solids samples.

In addition, product requirements for storage, shipping and handling will be considered.

Only those polymers considered for primary use that have been previously tested will be used in formulating the information necessary for bids. The bidder should list additional polymers, which the city could, during the contract period, substitute for the primary materials listed in the specifications.

These backup or alternate materials do not have to be field evaluated, but must be shown to have prior application as a sludge conditioner. The contractors shall supply the following data on all such alternate materials: Unit cost, specific gravity, form and percent solids. The unit cost for polymer bid shall be based on the assumption that if the alternate polymers are utilized to achieve the production rate specified, the city may purchase part or all of the remaining quantities of polymer necessary from the alternates listed in lieu of purchasing the primary polymer that the award of bid was based upon the cost. Therefore, include all considerations needed in supplying any polymers to the sludge dewatering facility in accordance with all related specifications in this contract.

Vendor's failure to provide polymers of the proper quantity will constitute a breach of this agreement, for which the city may seek alternative sources of suitable materials at the vendor's expense and remedies herein or other remedies as otherwise available at law or equity. PRODUCT BULLETIN

# CLARIFLOC CE-1791 POLYMER

## PRINCIPAL USES

CLARIFLOC CE-1791 is a **very high** charge cationic polyacrylamide in emulsion form that is used as a flocculant in a wide variety of municipal wastewater treatment applications. It has been successfully applied in all liquid/solids separation systems including clarification, thickening, and dewatering.

## TYPICAL PROPERTIES

| | |
|---|---|
| Physical Form | Clear to Milky White Liquid |
| Cationicity | 80 % |
| Active Polyacrylamide Min. | 41.0% |
| Specific Gravity | 1.01 - 1.05 |
| Freezing Point | 7 F. (-14 C.) |
| Density | 8.5 - 8.6 Lb/Gal |

## PREPARATION AND FEEDING

CLARIFLOC CE-1791 is a single component emulsion polymer that must be pre-diluted in water before use. In most cases, this product should not be applied neat. One method for dilution is adding the neat polymer into the vortex of a mixed tank at a concentration between 0.25-1.0% polymer (0.5% is optimum) by weight. The polymer can also be injected through a number of commercially available systems that provide in-line mechanical mixing. The best feed systems use initial high energy mixing (>1000 rpm) for a short time (<30 sec) to achieve good dispersion followed by low energy mixing (<400 rpm) for a longer time (10-30 min). Polymer solutions should be aged for 15-60 minutes for best results. Solution shelf life is 8-16 hours.

## MATERIALS OF CONSTRUCTION

Cross-linked polyethylene, fiberglass, stainless steel or lined steel are the preferred materials of construction for bulk tanks. Avoid natural rubber and Buna-N gaskets as these materials swell when placed in contact with neat polymer. Unlined mild steel, black iron, galvanized steel, copper or brass are not recommended in any part of the feed system. Stainless steel, Viton or Teflon are the best choices for pump heads. For feed lines, use PVC or reinforced Tygon tubing.

## MANUFACTURING SPECIFICATIONS

| | |
|---|---|
| Total Solids | 45.5 - 52.5 |
| Residual AcAm | < 1000 ppm |
| Neat Viscosity | 300-2000 cPs |
| UL Viscosity | 2.4 - 3.1 |

## HANDLING AND STORAGE

Suggested in-plant storage life is 6 months in unopened drums. For best results, store at 50-80 F. Bulk tanks should be mixed by periodically recirculating the contents bottom to top. Bulk tanks can also be fitted with an agitator type mixer that reaches the bottom 2 feet of the tank. Drums and bins should be mixed very well before first use and weekly after that. Do not allow emulsion polymers to freeze. Should freezing occur, allow the product to thaw thoroughly in a heated area and mix well before attempting to use it. For spills of CLARIFLOC CE-1791, sprinkle vermiculite or equivalent absorbant over the spill area and sweep the material into approved chemical disposal containers. Do not spray water onto a spill because the resulting gel is very difficult to clean up.

## SAFETY INFORMATION

CLARIFLOC CE-1791 is a mildly acidic product that can irritate the skin and eyes and should be handled accordingly. Gloves, goggles and apron are highly recommended. Anyone responsible for the procure-ment, use or disposal of this product should familiarize themselves with the appropriate safety and handling precautions involved. Such information is outlined in the **POLYDYNE** Material Safety Data Sheet. In the event of an emergency with this product, contact Chemtrec anytime day or night at (800) 424-9300.

## SHIPPING

CLARIFLOC CE-1791 Polymer is shipped in 55 gallon drums containing 450 pounds net or in 275 gallon totes containing 2300 pounds net. Bulk quantities are also available.

Questions and Answers

**This addendum forms part of the bidding and contract documents and modifies the original bidding documents dated 1/6/2020. Acknowledge receipt of this addendum in the space provided below. FAILURE TO DO SO WILL SUBJECT BIDDER TO DISQUALIFICATION.**

1. We have a claims made insurance policy, with an option to purchase tail coverage. Would this be acceptable to the city? (the bid states the insurance should be an occurrence based policy). The City will not accept a claims made insurance policy.

2. On page 13 – 14, the initial term of the contract is stated as 3 years with two 1 year extensions. It also discusses possible price adjustments. The term of the contract is 3 years, with the option to renew 2 additional years in one-year intervals.

3. On page 33, the term is stated as 15 months with an estimated usage of 20 totes. This is correct. The plant uses 20 totes every 15 months

# Appendix I – ACH Form

The City of Galveston would like to thank you for the services you and your company have provided for us in the past, present, and in the future. For those services provided you have more than likely received payments via a paper check in the mail. As we all know, that process is slow, inefficient, and costly for us and for you as the recipient.

Mail can be delayed, lost, or even stolen causing payments to be late and we may then face penalties and late fees. The City of Galveston would like to streamline our payment process with electronic payments. These payments will be transferred electronically from our financial institute to your financial institute. The process will get your payments to you in a quicker, more reliable, and more efficient manner.

If you would like to sign up to start receiving all of your payments via ACH / Wire Transfers, please fill out the authorization forms and return to the City of Galveston Finance Department.

Please email to:

accountspayable@galvestontx.gov

It is the intent of these specifications that the contractor furnishes chlorine, sodium hypochlorite, and ammonia that the City of Galveston requires during the period of the agreement. The City reserves the right to order such quantities as it requires, and the City also reserves the right not to order any quantities during the period of the agreement.

Any and all quantities listed are only estimates based on prior years' usage and are for acquainting the bidder with probable usage. These estimates are not intended to set forth minimum or maximum quantities of this contract.

The Contract period shall be for 3 years. Wherever possible, the City desires firm prices for the full contract period. Clean surface thoroughly to remove residual contamination.<br>Never return spills in original containers for re-use. For waste disposal, see Section 13 of the SDS. |

## 7. Handling and storage

| | |
|---|---|
| **Precautions for safe handling** | Wear appropriate personal protective equipment. Do not get in eyes, on skin, on clothing. Chemical attack increases with solution strength. Use with adequate ventilation. Observe good industrial hygiene practices. Do not apply heat or direct sunlight. Temperature and product concentration affect product quality and decomposition rates. |
| **Conditions for safe storage, including any incompatibilities** | Handle containers carefully to prevent damage and spillage. Keep container tightly closed. Store in a cool and well-ventilated place. Store in a corrosive resistant container. Consult container manufacturer for additional guidance. Store away from and do not mix with incompatible materials such as acids, ammonia, urea, oxidizers, organics and metals such as nickel, copper, tin, aluminum and iron. |

## 4. First Aid Measures

| | |
|---|---|
| **General** | Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. |
| **Inhalation** | Move victim to fresh air. Apply artificial respiration if victim is not breathing. Do not use mouth-to-mouth method if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one- way valve or other proper respiratory medical device. Administer oxygen if breathing is difficult. GET IMMEDIATE MEDICAL ATTENTION |
| **Eyes** | Flush immediately with clean fresh water for at least 10 minutes, holding the eyelids apart. Remove contact lenses, if present, and safe to do so. Continue rinsing. GET IMMEDIATE MEDICAL ATTENTION. |
| **Skin** | In case of contact with substance, immediately flush skin with running water for at least 20 minutes. Exposure to liquid may cause frostbite burns. Remove contaminated clothing, jewelry and shoes. Wash skin with soap and water. Thoroughly clean and dry contaminated clothing and shoes before reuse. GET IMMEDIATE MEDICAL ATTENTION |
| **Ingestion** | If accidentally swallowed obtain IMMEDIATE MEDICAL ATTENTION. Keep at rest. Do NOT induce vomiting. Ingestion not considered a likely route of exposure. |
| **Most important symptoms and effects, both acute and delayed** | |
| **Overview** | Contact with this material will cause burns to the skin, eyes and mucous membranes. Unconsciousness. Cough, shortness of breath, headache, nausea, vomiting. May cause lung damage. |
| **Indication of immediate medical attention and special treatment needed** | For liquid contact, treat the affected person for frostbite if necessary. If the product is ingested, probable mucosal damage may contraindicate the use of gastric lavage. Treat the affected person appropriately. Provide general supportive measures and treat symptomatically. Symptoms may be delayed. |

## 5. Fire-fighting measures

| | |
|---|---|
| **Recommended Extinguishing media** | Use fire-extinguishing media appropriate for surrounding materials. |
| **Unsuitable extinguishing media** | Direct water spray. Direct water spray jet. |
| **Special hazards arising from the substance or mixture** | May cause fire or explosion; strong oxidizer. Contents under pressure. Pressurized container may explode when exposed to heat or flame. Contact with reactive metals e.g., aluminum, zinc and tin may result in the generation of flammable hydrogen gas. Water used for fire extinguishing, which has been in contact with the product, may be corrosive. Water spray on active leak may promote accelerated corrosion of container and accelerate rate of leakage. |
| **Advice for fire-fighters** | Wear full protective clothing, including helmet, self-contained positive pressure or pressure demand breathing apparatus, protective clothing and face mask. Additional protective clothing must be worn to prevent personal contact with this material. Those items include but are not limited to: boots gloves, hard hat, splash-proof goggles, full face shield and impervious clothing, i.e. chemically impermeable suit. Compatible materials for response to this material are neoprene and butyl rubber.<br><br>In case of fire and/or explosion do not breathe fumes. Remove pressurized gas cylinders from the immediate vicinity. Cylinders can burst violently when heated, due to excess pressure build-up. Cool containers / tanks with water spray. Evacuate area and fight fire remotely due to the risk of explosion.<br>**ERG Guide No. 124** |

## 6. Accidental Release Measures

| | |
|---|---|
| **Personal precautions, protective equipment and emergency procedures** | Immediately evacuate personnel to safe areas. Many gases are heavier than air and will spread along ground and collect in low or confined areas (sewers, basements, tanks). Keep people away from and upwind of spill/leak. Keep out of low areas. Keep unnecessary personnel away. Ventilate closed spaces before entering them. Wear appropriate protective equipment and clothing during clean-up. Local authorities should be advised if significant spillages cannot be contained. For response to Chlorine gas it is recommended to use as a minimum level "B " protection that is compatible to Chlorine. For Liquid spills it is recommended to utilize as a minimum enhanced level "B" (Enhanced Level "B" is the addition of a splash hood). Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Responders can reference Chlorine Institute pamphlet #65 on PPE. |
| **Environmental precautions** | Avoid discharge into drains, water courses or onto the ground. Contact local authorities in case of spillage to drain/aquatic environment. |
| **Methods and material for containment and cleaning up** | Extinguish all flames in the vicinity. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Ventilate well, stop flow of gas or liquid if possible. If possible, turn leaking containers so that gas escapes rather than liquid. Dike far ahead of spill for later disposal. Isolate area until gas has dispersed. Neutralize spilled material with crushed limestone, soda ash or lime. Collect spillage. |

## 7. Handling and storage

| | |
|---|---|
| **Precautions for safe handling** | Avoid heat, sparks, open flames and other ignition sources. Keep away from clothing and other combustible materials. Use only chlorine-compatible lubricants. Do not use greases and oils. Do not breathe gas. Do not get in eyes, on skin, on clothing. Use in a sealed system and/or a well-ventilated area. Wear appropriate personal protective equipment. Observe good industrial hygiene practices. Avoid release to the environment. |
| **Conditions for safe storage, including any incompatibilities** | Contents under pressure. Keep away from heat, sparks and open flame. Secure cylinders in an upright position at all times, close all valves when not in use. Store in a well-ventilated place. Store away from incompatible materials.<br><br>Store at temperatures not exceeding 131 °F ( 55°C) For the above specified temperature the system pressure is 225 psig. |

## 8. Exposure controls and personal protection

| | | US ACGIH Threshold limit values | TWA | 0.5 ppm |

| | |
|---|---|
| **Engineering Controls** | Should be handled in closed systems, if possible. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure limits suitable respiratory protection must be worn. Observe Occupational Exposure Limits and minimize the risk of inhalation. Eye wash facilities and emergency shower must be available when handling this product. |

**Individual protection measures, such as personal protective equipment**

| | |
|---|---|

Questions and Answers

**This addendum forms part of the bidding and contract documents and modifies the original bidding documents dated 1/6/2020. Acknowledge receipt of this addendum in the space provided below. FAILURE TO DO SO WILL SUBJECT BIDDER TO DISQUALIFICATION.**

1. I noticed in the bid package it states that the annual chlorine ton usage is 250 tons/year. We have been supplying this product for several years and the usage is actually about 60 tons per year. A few years ago the big WWTP that used about 180 tons/year converted to UV for treatment, so they don't use tons at that locations any more. Could we get that clarified for the bid? Supply Division = Approx. 70 tons, with the addition of the 59th street pump station. 65 – 1 ton cylinders for Wastewater Plus the 170 of the 150 cylinders for the west plants and Main reuse water.

**I hereby certify receipt of this addendum and have incorporated its information or changes in preparation of my submittal.**

## 4. First Aid Measures

| | |
|---|---|
| **General** | Move victim to fresh air. Call 911 or emergency medical service. Give artificial respiration if victim is not breathing. Do not use mouth-to-mouth method if victim ingested or inhaled the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Administer oxygen if breathing is difficult. Remove and isolate contaminated clothing and shoes. In case of contact with liquefied gas, thaw frosted parts with lukewarm water. In case of contact with substance, immediately flush skin or eyes with running water for at least 20 minutes. Keep victim warm and quiet. Keep victim under observation. Effects of contact or inhalation may be delayed. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. |
| **Inhalation** | Move victim to fresh air. Call emergency medical care. Apply artificial respiration if victim is not breathing. Do not use mouth-to-mouth method if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one- way valve or other proper respiratory medical device. Administer oxygen if breathing is difficult. |
| **Eyes** | Irrigate copiously with clean fresh water for at least 10 minutes, holding the eyelids apart and seek medical attention. |
| **Skin** | Remove and isolate contaminated clothing and shoes. In case of contact with liquefied gas, thaw frosted parts with lukewarm water. In case of contact with substance, immediately flush skin or eyes with running water for at least 20 minutes. Keep victim warm and quiet. Keep victim under observation. |
| **Ingestion** | If accidentally swallowed obtain immediate medical attention. Keep at rest. Do NOT induce vomiting. |
| **Most important symptoms and effects, both acute and delayed** | |
| **Overview** | Effects of contact or inhalation may be delayed. Direct contact can cause frostbite and burns. Contact with eyes can cause frostbite, burns and damage to the cornea. See section 2 for further details. |
| **Indication of immediate medical attention and special treatment needed** | Toxic if inhaled. Causes serious eye damage. Causes severe skin burns and eye damage. |

## 5. Fire-fighting measures

| | |
|---|---|
| **Recommended Extinguishing media** | Use fire-extinguishing media appropriate for surrounding materials. |
| **Unsuitable extinguishing media** | Direct water spray. Direct water spray jet. |
| **Special hazards arising from the substance or mixture** | Does not decompose but will react with water or steam to produce corrosive sulfurous acid. Do not breathe mist / vapors / spray. |
| **Advice for fire-fighters** | Wear positive pressure self-contained breathing apparatus (SCBA). Wear chemical protective clothing that is specifically recommended by the manufacturer. It may provide little or no thermal protection. Structural firefighters' protective clothing provides limited protection in fire situations ONLY; it is not effective in spill situations where direct contact with the substance is possible. Stop flow of gas if safe to do so. Some may burn but none ignite readily. Vapors from liquefied gas are initially heavier than air and spread along ground. Some of these materials may react violently with water. Cylinders exposed to fire may vent and release toxic and/or corrosive gas through pressure relief devices. Containers may explode when heated. Ruptured cylinders may rocket. TOXIC; may be fatal if inhaled, ingested or absorbed through skin. Vapors are extremely irritating and corrosive. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite. Fire will produce irritating, corrosive and/or toxic gases. Runoff from fire control may cause pollution.<br>**ERG Guide No. 125** |

# Safety Data Sheet

## 6. Accidental Release Measures

| | |
|---|---|
| **Personal precautions, protective equipment and emergency procedures** | Fully encapsulating, vapor protective clothing should be worn for spills and leaks with no fire. Do not touch or walk through spilled material. Stop leak if you can do it without risk. If possible, turn leaking containers so that gas escapes rather than liquid. Prevent entry into waterways, sewers, basements or confined areas. Do not direct water at spill or source of leak. Use water spray to reduce vapors or divert vapor cloud drift. Avoid allowing water runoff to contact spilled material. Isolate area until gas has dispersed. |
| **Environmental precautions** | Do not allow spills to enter drains or watercourses. Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse. |
| **Methods and material for containment and cleaning up** | CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed in Section 1. As an immediate precautionary measure, isolate spill or leak area. Keep unauthorized personnel away. Stay upwind. Many gases are heavier than air and will spread along ground and collect in low or confined areas (sewers, basements, tanks). Keep out of low areas. Ventilate closed spaces before entering. |

## 7. Handling and storage

| | |
|---|---|
| **Precautions for safe handling** | Wear leather safety gloves and safety shoes when handling cylinders. Protect cylinders from physical damage; do not drag, roll, slide or drop. While moving cylinder, always keep in place removable valve cover. Never attempt to lift a cylinder by its cap; the cap is intended solely to protect the valve. Never insert an object (e.g., wrench, screwdriver, pry bar) into cap openings; doing so may damage the valve and cause a leak. Use an adjustable strap wrench to remove over-tight or rusted caps. Slowly open the valve. Close the container valve after each use; keep closed even when empty. Never apply flame or localized heat directly to any part of the container. High temperatures may damage the container and could cause the pressure relief device to fail prematurely, venting the container contents |
| **Conditions for safe storage, including any incompatibilities** | Personnel should be thoroughly trained. Materials should be stored in approved containers. Firmly secure containers upright to keep them from falling or being knocked over. Store away from combustibles. Avoid exposure to moisture, high temperatures, and incompatible materials. Use only with adequate ventilation or respiratory protection. Have safety showers and eyewash fountains immediately available. |

## 8. Exposure controls and personal protection

**Exposure Control parameters**

| CAS No. | Ingestion | Source | Value |
|---|---|---|---|
| 7446-09-5 | Sulfur dioxide | OSHA | TWA 2 ppm (5 mg/m3) STEL 5 ppm (13 mg/m3) |
| | | ACGIH | TWA: 0.25 ppm STEL: 2 ppm |
| | | NIOSH | TWA 2 ppm (5 mg/m3) STEL 5 ppm (13 mg/m3) |

**Individual protection measures, such as personal protective equipment**

| | |
|---|---|
| **Respiratory** | Use NIOSH/MSHA approved respirator, following manufacturer's recommendations when concentrations exceed permissible exposure limits. For emergencies or instances with unknown exposure levels, use a self-contained breathing apparatus (SCBA). |
| **Eyes** | Wear safety glasses with side shields and/or safety goggles to protect the eyes. An eye wash station is suggested as a good workplace practice. |
| **Skin** | Chemical resistant clothing such as coveralls/apron boots should be worn. Chemical impervious gloves. Emergency eyewash station should be in close proximity. |
| **Engineering Controls** | Provide adequate ventilation. Where practicable this should be achieved by the use of local exhause ventilation and good general extraction. Eye wash and safety showers should be available when handling this product. |
| **Other Work Practices** | Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse. |

(c) If a change order involves a decrease or an increase of $50,000 or less, the governing body may grant general authority to an administrative official of the municipality to approve the change orders.

(c-1) If a change order for a public works contract in a municipality with a population of 300,000 or more involves a decrease or an increase of $100,000 or less, or a lesser amount as provided by ordinance, the governing body of the municipality may grant general authority to an administrative official of the municipality to approve the change order.

The City of Galveston would like to thank you for the services you and your company have provided for us in the past, present, and in the future. For those services provided you have more than likely received payments via a paper check in the mail. As we all know, that process is slow, inefficient, and costly for us and for you as the recipient.

Mail can be delayed, lost, or even stolen causing payments to be late and we may then face penalties and late fees. The City of Galveston would like to streamline our payment process with electronic payments. These payments will be transferred electronically from our financial institute to your financial institute. The process will get your payments to you in a quicker, more reliable, and more efficient manner.

If you would like to sign up to start receiving all of your payments via ACH / Wire Transfers, please fill out the authorization forms and return to the City of Galveston Finance Department.

## SECTION 4: FIRST AID MEASURES

### 4.1 Summary of First Aid Measures

**Eye Exposure**

• Flush eyes with running water for 10-15 minutes. If individual is wearing contact lenses, remove them. Hold eyelids apart while flushing with water. Seek medical attention.

**Skin Exposure**

• Rinse with water for 5 minutes. Remove and wash any clothing exposed to the solution before reuse. If irritation and swelling persist, seek medical attention.

**Inhalation**

• Remove from further exposure. Expose individual to fresh air. If not breathing, give proper artificial respiration. If breathing is difficult, trained personnel should administer oxygen. Seek immediate medical attention.

**Ingestion**

• If victim is conscious and alert give 2-3 glasses of water. **Do Not** induce vomiting. Do not give anything to drink to an unconscious person. Do not leave victim unattended. To prevent aspiration, lay victim on side with head lower than waist. Vomiting may occur simultaneously. Seek immediate medical attention.

### 4.2 Summary of Acute Health Hazards

**Ingestion**

• Can produce burns on the mouth and lips, severe gastrointestinal irritation, nausea, bloody diarrhea, difficult swallowing, severe abdominal pains, thirst, acidemia, difficult breathing, convulsions, collapse, shock and death.

**Inhalation**

• Breathing of vapor or mist is possible. Breathing this material may be harmful or fatal. Symptoms may include severe irritation and burns to the nose, throat, and respiratory tract.

**Skin**

• May cause permanent skin burns. Phosphoric acid may not produce an immediate burning sensation upon contact, delaying the awareness of the worker that contact has occurred. Symptoms may include redness, burning, and swelling of skin, burns, and other skin damage.

**Eyes**

• Can cause permanent eye injury. Symptoms include stinging, tearing, redness, and swelling of eyes. Can injure the cornea and cause blindness. Vapor or spray may cause eye damage, impaired sight or blindness.

**Note to Physicians**

• Preexisting disorders of the following organs (or organ systems) may be aggravated by exposure to this material: skin, lung, (for example, asthma like conditions).

### 4.3 Summary of Chronic Health

• There is no evidence that phosphorous poisoning can result from contact with phosphoric acid. The risk of pulmonary edema resulting from the inhalation of mist or spray is remote. Prolonged inhalation may cause respiratory tract inflammation and lung damage.

## SECTION 5: FIREFIGHTING MEASURES

### 5.1 Extinguishing Media

Suitable Extinguishing Media

• Not combustible. Use extinguishing media suitable for surrounding fire.

Unsuitable Extinguishing Media

• None

### 5.2 Special Hazards

| | |
|---|---|
| Unusual Fire and Explosion Hazards | • This product is non-flammable and non-combustible. |
| Special Fire Fighting Procedures | • **SLI-932** does not support combustion. Remove any containers from fire area if they have not been exposed to heat and if it can be done without risk to personnel. Use water spray to keep containers cool and to flush away any spillage away from metals and fire. Incipient fire fighters should use positive pressure self-contained breathing apparatus (SCBA). |

## SECTION 6: ACCIDENTAL RELEASE MEASURES

### 6.1 Personal Precautions, Protective Equipment & Emergency Procedures

**For non-emergency personnel**

| | |
|---|---|
| Protective Equipment | • Use recommended respiratory protection. Wear suitable protective clothing, gloves and eye/face protection. |
| Emergency Procedures | • Stop leak if safe to do so. Eliminate ignition sources. Evacuate unnecessary personnel. Ventilate area. Keep upwind. |

**For emergency responders**

| | |
|---|---|
| Protective Equipment | • Use recommended respiratory protection. Wear suitable protective clothing, gloves and eye/face protection. |
| Emergency Procedures | • Stop leak if safe to do so. Eliminate ignition sources. Evacuate unnecessary personnel. Ventilate area. |

### 6.2 Methods and Material for Containment and Cleaning Up

| | |
|---|---|
| Containment | • If possible, dike spill and/or contain. Do not allow into drains or water courses or dispose of where ground or surface waters may be affected. |
| Cleaning Up | • Ventilate area. Small quantities of liquid spill: take up in non-combustible inert absorbent material and shovel into container for disposal. Collect absorbed material and place into sealed, labelled container to be disposed at an appropriate disposal facility according to current applicable laws and regulations and product characteristics at the time of disposal. Liquid spill: neutralize with powdered limestone or sodium bicarbonate. Practice good housekeeping – spillage can be slippery on smooth surface either wet or dry. |

### 6.3 Environmental Precautions

If spill could enter any waterway, including intermittent dry creeks, contact the U.S. COAST GUARD NATIONAL RESPONSE CENTER at 800-424-8802. In case of accident or road spill notify CHEMTREC at 800-424-9300.

## SECTION 7: HANDLING AND STORAGE

### 7.1 Precautions for Safe Handling

Handling

• Avoid all eye and skin contact and do not breathe vapor and mist. Wear recommended personal protective equipment. Ensure there is adequate ventilation. Keep away from heat and sources of ignition. Employ good maintenance practices to prevent leaks. Use good process control measures to prevent releases. Do not add water to acid. When diluting, always add acid to water. Causes severe burns.

### 7.2 Conditions for Safe Storage, Including Any Incompatibilities

Storage

• Store drums in a cool, dry location away from direct sunlight and source of heat. Keep drums tightly sealed. Use caution handling empty drums which may contain residual product, liquid and/or vapors. Store away from incompatible materials.

### 7.3 Specific Use(s)

• Water treatment; corrosion inhibitor

## DEPARTMENT OF PUBLIC WORKS

Angelo Grasso, Director of Municipal Utilities
agrasso@galvestontx.gov | Office Number: (409) 797-3962 | www.galvestontx.gov

**Date:** February 2, 2020

**To:** Brian Maxwell, City Manager
Hon. Mayor and City Council Members

**From:** Angelo Grasso, Director of Municipal Utilities

**Re:** City Council to consider for approval the purchase and installation of a Spindle Drive for Lift Station #1 by Duperon at a cost of $38,500.00. Authorizing the City Manager to execute all necessary documents upon final approval by the City Attorney.

## I. Background

A. Lift Station #1 is located at 29th Street and Harborside Drive. This lift station pumps raw sewage from the area east of 29th Street to the Main Wastewater Treatment Plant.

B. The bar screen removes large items such as rags at the lift station head works to prevent clogging of pumps and facilities that are required for lift station pumping operations.

## II. Current Situation:

A. The Wastewater Division Staff has observed that spindle drive on the Lift Station #1 bar screen is not working correctly and in need of replacement.

B. City Staff obtained a quote from Duperon, the bar screen spindle drive manufacturer, for replacement parts and installation of a new spindle drive. The cost to provide and install a new spindle drive is $38,500.00.

C. A sole source purchase is required since the City is replacing the existing Duperon spindle drive. Duperon is the sole source provider and installer of the spindle drive used for the bar screen at Lift Station #1.

## III. Issues:

A. Failure to replace the spindle drive for the Lift Station #1 bar screen would lead to rags and large debris entering the Main Wastewater Treatment Plant system piping and pumps which could clog, damage facilities and interrupt wastewater treatment operations, which could possibly lead to non-compliance with TCEQ regulations.

The City anticipates that contract shall be renewed pursuant to the availability of funds and at the discretion of the City. The following clauses shall be included in the contract:**

A. Option Clause: It is agreed that City will have the option to extend the contract for up to two (2) additional years, in one-year intervals. To exercise this option, the City shall serve notice 30 days prior to contract termination or to the end of any extension. The Option to Extend will not be considered if funding is unavailable or if the contractor's past performance is not within the industry standard.

B. Escalation Clause: Should market conditions prevail which dictate an increase, the successful contractor may submit documentation requesting permission to increase pricing no later than 30 days after receiving notice from the City of its intent to extend the agreement. **2019-2023 Capital Investment Plan for City Managed Parks**
**Park Board of Trustees**

Transmittal Letter

Attached please find the 2019-2023 Five Year Fiscal Capital Improvement Plan for the Park Board managed City parks. The plan is being submitted to City Council for approval with the intention of establishing transparency in planning, investment and project execution of Park Board managed assets.

Each project is drawn from a series of institutional documents, including City of Galveston Parks, Recreation, and Open Space Master Plan, Park Board East End Parks Master Plan, EEL Business Plan, FEMA Project Worksheets, Preventative Maintenance and Replacement plans or specific project mandates associated with solicited funding which guide park amenity development.

Funding for these projects is comprised of operational funds generated by the Parks each year, grant funding, oil spill recovery funds and FEMA recovery funds. While funds for several projects have been secured from outside sources (RESTORE, CMP, CEPRA) others are in the process of being solicited.

**Conclusion**

The Park Board of Trustees requests that City Council approve the herein contained Five Year Capital Investment Plan, with the full understanding that each year the Park Board will solicit and obtain City Council support of detailed, annual CIP which will contain final allocated funding and costs.

Sincerely,

Spencer Priest, Chair
Galveston Island Park Board of Trustees

Kelly de Schaun, Executive Director
Galveston Island Park Board of Trustees
