### What are Significant Trees?

1. A significant tree has a diameter at breast height (DBH) of 10 inches or greater; or
2. A significant tree stand is a group of trees with interconnected canopies that cover a total of at least 10,000 square feet of ground area.

### What are the standards for removal of Significant Trees?

The City Manager or City Arborist, if applicable, may approve the removal of a significant tree or tree stand if it is demonstrated that:

1. No reasonable alternative site design at the same development intensity could be approved that:
  - a. Would preserve the tree(s);
  - b. If large-scale preservation is not possible, would preserve the largest of the trees; or
  - c. If protection of the largest tree(s) is not possible, would preserve a greater number of trees than the proposed development design.
2. It is located within 10 feet of an approved building footprint of new construction or addition;
3. It is located within 6 feet of a utility easement and would interfere with the use of the easement as determined by the City Engineer;
4. It is located within 8 feet of an approved outdoor recreation area that by its nature requires the removal of the trees, such as ball fields;
5. It is ordered removed by the City Manager for other emergency reasons;
6. It is being grown and removed for agricultural purposes; or
7. It is certified to the City by an International Society of Arboriculture Certified Arborist or degreed Forester as having one or more of the following conditions:
  - a. Unhealthy or structurally unsound;
  - b. Damaged by natural causes beyond the point of recovery;
  - c. Diseased beyond the point of recovery;
  - d. Poses a threat to the public and must be removed as a safety measure; or
  - e. No longer living.
