April marked another busy month for the City of Galveston.

In April, crews started construction of the concrete cap over the now demolished municipal incinerator on Lennox Avenue. The City anticipates completing the cap by the end of the summer and will draw a close to a project that has been sought for decades to improve blighted structures.

Also last month, the City finished replacing the downtown gas lamps. Neighborhood funds paid for the project to complete the replacement of the gas lamps, which are brighter and more efficient than the previous lamps, but maintain the historical integrity of downtown Galveston.

The Galveston City Council also approved new FEMA flood maps, ensuring our eligibility in the flood insurance program. The City’s Development Services department has worked diligently to educate permit seekers on what the new maps will mean for local building code. The change goes into effect August 15 and will update city code to be current with the most recent recommendations pertaining to flood damage prevention.

Additionally, the Grants and Housing Department continued their preparation for the City’s multi-year planning document to establish the priorities and goals for the housing and community development needs – and how federal housing grants can be used to best serve the island. The department collected public feedback through surveys and a hosted two public meetings, including one for residents and one during a council meeting.

We have much to look forward to as we head into the summer. We will soon begin the 25th Street project to repave one of Galveston’s main corridors. City Council will also consider approving its 100th Landmark Designation – fittingly, for the home of our Historic Preservation Officer and Assistant Director of Development Services. In Galveston, we’re proud of our history – and excited for our future.

Sincerely,

Brian Maxwell, City Manager
