

DRAFT Key Recommendations

1. Restore Pocket Parks #1 (AP-6), #2 (AP-9), #3 (AP-13), and Develop Pocket Park #4 (AP-32).
2. Restore “Phantom” non-compliant access points. (Paul to develop list of these)
3. Create and Install City-branded directional and wayfinding signage.
4. Clearly identify on-street public parking spaces by providing adequate signage and pavement-markings.
5. Restore the dune line, prioritizing critically eroding beaches (as defined by BEG shoreline change analysis).
6. *Use city-owned property for off-beach parking areas, and if possible, acquire more property.*
7. *Research and clarify ownership of public access resources (streets, lots, parking, access paths to beach).*
8. Improve safety at access paths by developing and implementing a plan for mitigating erosion associated with drainage to the beach.
9. Develop strategies to mitigate dune and beach erosion from on-beach vehicular access.
